Department of Irrigation – Northern Province

Date: 27.11.2025

1. Reservoir Status – Northern Province

The Northern Province consists of 54 Major and Medium Irrigation Schemes. Based on the latest observations:

- Tanks currently spilling : 13
- Reservoirs at 75% – 100% capacity : 08
- Reservoirs at 50% – 74% capacity : 12
- Reservoirs at 25% – 49% capacity : 14
- Reservoirs below 25% capacity : 05

2. Key Reservoir Levels

- Iranamadu Tank : 21'-11" (35.22% of capacity)
- Vavunikulam Tank : 15'-09" (34% of capacity)
- Muththuiyankadu Tank : 14'-03" (40% of capacity)

3. Rainfall Situation - Maintained By Department of Irrigation - NP

Period of Observation: 26.11.2025 (7.00 a.m.) to 27.11.2025 (7.00 a.m.)

High Rainfall recorded during the observation period:

- Vavuniya Station : 165 mm
- Chemamadu Station : 151 mm
- Thannimurippu Station : 125 mm

Low rainfall recorded areas:

- Thondaimanaru Station : 0.0 mm
- Jaffna Station : 1 mm

4. Summary

The province has received significant rainfall in several areas, resulting in increased storage levels and spilling in 13 medium tanks. At present, no risk has been identified in any of the reservoirs or irrigation systems, and continuous monitoring is being carried out to ensure the safety of the schemes.
